Experienced plumber and heating engineer with over 15 years of hands-on expertise, following a family tradition of craftsmanship passed down from father to son. I specialise in the installation, maintenance and troubleshooting of gas and drinking water networks, working across residential, individual and emergency sites.

Known for my precision, autonomy and adaptability, I am ready to join your company and contribute to technically demanding projects, in full compliance with quality and safety standards.

WORK EXPERIENCE

Self-Employed Plumber & Heating Engineer

Algeria | 2015 – Present

- Full installation of gas and drinking water networks
- Maintenance and modernisation of existing systems
- Fault diagnosis and resolution (leaks, pressure issues, malfunctions)
- Client relationship management: quotes, negotiation, invoicing
- Autonomous scheduling and coordination of interventions and sites
- Strict compliance with deadlines and safety standards in force
- Built a loyal client base through quality of service and responsiveness

→ **Projects completed:** Schools and public institutions, private residential sites and households.
