Unsolicited Application — Plumber & Heating Engineer Position

Dear Sir or Madam,

With over 15 years of experience in plumbing and heating engineering, gained both as a self-employed tradesman and within a demanding family business, I am writing to submit my unsolicited application for a position as Plumber and Heating Engineer within your company.

Throughout my career, I have developed strong expertise in the full installation of drinking water and gas networks, preventive and corrective maintenance, as well as fault diagnosis and technical problem-solving. I have worked across a wide variety of sites — schools, public institutions, private residences and households — which has given me a strong capacity for adaptation and a sharp sense of organisation.

Accustomed to working independently, I am equally comfortable in a team environment and able to integrate quickly into new working methods. I am proficient in reading technical plans, conducting pressure and tightness tests, and complying with gas and water safety regulations. My day-to-day experience managing client relationships — quoting, negotiating and invoicing — gives me a well-rounded view of the trade, well beyond its purely technical dimension.

Eager to bring my expertise to a reputable European company, I am available immediately and fully prepared to relocate. I am committed to rapidly improving my command of the local language in order to integrate as effectively as possible into your team and working environment.

Confident that my profile and commitment align with your company's expectations, I remain at your full disposal for an interview at your convenience. Please find my curriculum vitae enclosed, which will allow you to review my background and skills in greater detail.

Thanking you in advance for the time you will devote to reviewing my application, I look forward to hearing from you and remain at your disposal for any further information.
